

Florian MONLAU is a researcher at the Technical Platform of APESA. He received in 2012 his PhD in bioprocess at the Laboratory of Environmental Biotechnology (LBE-INRA). He also realized a one year postdoctoral under the European “Star Agroenergy” Project in Foggia (Italy) and another one at the INRA-IATE in Montpellier (France). His skills are biorefinery concept especially biofuels production by biological pathways from various kinds of biomasses. He has a specific experience in the field of the anaerobic digestion process and its integration in a biorefinery chain. He is (co) author of over 21 refereed journal publications.
