

**Dr. Hélène Angellier-Coussy** (F) is graduated from the French Engineering School of Paper, Printing and Biomaterials of Grenoble (INPG-PAGORA). She obtained in 2005 a PhD degree in Material Science and Engineering with a work on starch-based bio-nanocomposites. Since 2007, she is associate professor in the Biological Engineering department at the IUT of Montpellier. Her research activities focus on better understanding the structure / properties relationships in sustainable food packaging materials. She is particularly interested in the eco-conversion of lignocellulosic wastes and by-products for the development of biocomposites. She obtained her HDR in 2014.
